

JATHEON TECHNOLOGIES EXPANDS CANADIAN DISTRIBUTION WITH INFOMAXIUM

TORONTO, ONTARIO. October 3, 2006 – Jatheon Technologies Inc., a leading provider of e-mail and message archiving appliances, today announced a Value Added Reseller (VAR) agreement with Infomaxium, one of Canada's leading IT consulting firms.

Jatheon has designed and developed **Plug n Comply™**, an Appliance based email and message archiving solution that is a necessity for companies seeking to meet today's high standards of regulatory compliance. Jatheon offers a comprehensive, cost effective, and easy to deploy archiving appliance that requires minimal IT support and simple management of corporate data, making it a suitable solution for companies of all sizes.

Jatheon's CEO Kieron Dowling is pleased to have Infomaxium offer Jatheon's archiving appliances to their customer base. "Infomaxium is a well respected VAR and service provider," said Dowling, "This agreement expands on our strategy to engage with top resellers in our target markets."

"Jatheon's archiving appliance allows us to offer a simple, cost effective option to our customers for regulatory compliance." said Manjit Sidhu, Partner and President of Infomaxium. "We see a growing opportunity across our market for e-mail and message archiving appliances and Jatheon's technology is an exciting addition to our portfolio."

About Jatheon

Founded in December 2004, Jatheon Technologies has developed the world's first non-intrusive network appliance simplifying archiving, indexing, retrieval and dynamic monitoring of corporate e-mail and messaging data. Jatheon appliances can be deployed in offices with as few as 50 employees and scale to the largest enterprise. Jatheon's **Plug n Comply™** offering is an integrated appliance that is simple, secure and scalable, offering absolute control of confidential messaging data whether it is e-mail or instant messaging. Jatheon has recently been honored with Deloitte's 10 Companies-to Watch Award. To learn more, visit www.jatheon.com.

About Infomaxium

Infomaxium provides business management and IT consulting services to Fortune 100 firms and system integrators focusing on program/project management, data integration, data warehousing, and testing services.
